kahonokun@gmail.com | +62 851-6136-6619 | [linkedin.com/in/kahonokun777/](https://www.linkedin.com/in/kahonokun777/) | github.com/harikahono

Frontend engineer with a cloud and infra background. I make sure the whole system works, from the pixel to the server. I build products that are fast, reliable, and ready to scale, because I dig into every layer until I understand it. Frontend is my home, but I'll jump into backend or deployment if that's what it takes to ship something solid.

EDUCATION

Institut Teknologi Indonesia

Bachelor of Science in Computer Science GPA: 3.30/4.00

Sep 2022 – Aug 2026

Tangerang Selatan, Banten

SMAS Plus Permata Insani Islamic School

Science Percentage: 90.03/100.00

Jul 2019 – Jun 2022

Tangerang, Banten

EXPERIENCE

CV Miftah Digital Solusi

Full-Stack Engineer

Jul 2025 – Dec 2025

Tangerang Selatan, Banten

- Engineered a full-stack goods-tracking system (Laravel, React) for a garment client, enhancing operational visibility and automating 100+ daily inventory movements, replacing manual processes.
- Engineered a full-stack event-organizer platform with Next.js and Laravel, facilitating end-to-end digital ticket sales and managing 500+ event registrations monthly.
- Spearheaded full-stack development for 2 client projects, designing robust APIs (Laravel) and implementing responsive UIs (React/Next.js), delivering production-ready features independently within a 3-person agile team.

Kampus Gratis (MBKM Internship, PT Menara Indonesia)

DevOps Engineer

Feb 2025 – Jul 2025

Tangerang Selatan, Banten

- Engineered and maintained Express.js and Laravel backend services, integrating third-party AI APIs to power critical new product features, enhancing application intelligence and user engagement.
- Designed and implemented CI/CD pipelines, automating build, test, and deployment processes, and containerized services with Docker/Kubernetes for 20% faster scalable delivery.
- Monitored infrastructure and application performance, resolving critical operational issues and achieving a 94.7/100 rating from engineering leadership for technical delivery.

Bangkit Academy (led by Google, Tokopedia, Gojek & Traveloka)

Cloud Computing Cohort

Sep 2024 – Dec 2024

Remote

- Completed 900+ hours across Google Cloud Engineer and DevOps/SRE learning paths, covering cloud infrastructure, backend RESTful API development (Node.js), applied machine learning, and Cloud Run deployment, averaging 92.8/100.
- Delivered a capstone product/application as part of a 200+ hour final project, applying cloud-native development practices end-to-end.
- Selected for a highly competitive nationwide scholarship cohort backed by Google, Tokopedia, Gojek, and Traveloka.

PROJECTS

SEIRIS seiris.codiroom.tech | Laravel 12, React 19, PostgreSQL, Pusher

- Built a full-stack equity allocation platform for student startup teams using the Slicing Pie model, helping teams track fair ownership based on actual contributions.
- Implemented real-time collaboration features with Pusher and designed the system around formal UML and finite-state-machine workflows.
- Developed the backend, frontend, database schema, and deployment flow independently as a final-year academic project.

PMB PKU-MI pmbpku.istiqlal.or.id | Next.js 16, Laravel 12, MySQL

- Designed and implemented comprehensive frontend interfaces for an end-to-end S2/S3 admission platform, enhancing user experience for hundreds of applicants at Istiqlal Mosque Jakarta.
- Implemented applicant-facing flows for registration, biographical data submission, document uploads, interview scheduling, and final result checking.

- Contributed to a paperless admission system supporting verification workflows, Zoom-integrated interviews, PDF documents, Excel exports, and role-based access control.

Z4 Foundation z4foundation.io | Next.js 16, React 19, TailwindCSS, Solana Wallet Adapter

- Built frontend interfaces for a Web3 agricultural land investment platform that fractionalizes land ownership through blockchain-based smart contracts.
- Integrated wallet-based user flows and translated complex Web3 investment concepts into clearer, investor-facing product screens.
- Developed responsive landing and dashboard experiences with motion and visualization tools including Framer Motion, GSAP, and Recharts.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, PHP, SQL, Python, Rust

Frameworks & Libraries: React, Next.js, Laravel, Express, TailwindCSS, Prisma, Pusher, Framer Motion

Developer Tools: Git, GitHub Actions, pnpm, Docker, PostgreSQL, MySQL, Vercel

Other Skills: REST API integration, authentication flows, role-based access control, real-time features, system documentation, basic Web3 integration, CLI development
